

I am concerned that radio station K-Love may lose its ability to broadcast on FM radio, as I am used to hearing them, due to LPFM priority. I urge you not to take K-Love off the airways. I have been a listener and a supporter of K-Love for several years, and I have benefited personally from the positive nature of K-Love's broadcasting as well as from the advertising that they do for local organizations in my community for which I have an interest. I know many K-Love listeners who would agree with me that, while there are many pop, country, rock and alternative radio stations for listeners to choose from, there is nothing else that provides the same uplifting music, the same positive message, or the same encouragement from the K-Love radio staff as you get from K-Love. To remove K-Love from the airwaves would be like removing nutritious food from your diet; there's a lot of junk you can eat out there to keep you full, but your body will not be the better for it without your protein, complex carbs, and veggies.

Thank you for your consideration.
